

KP412/ BB Cable Guide

3mm Cable Tie Required

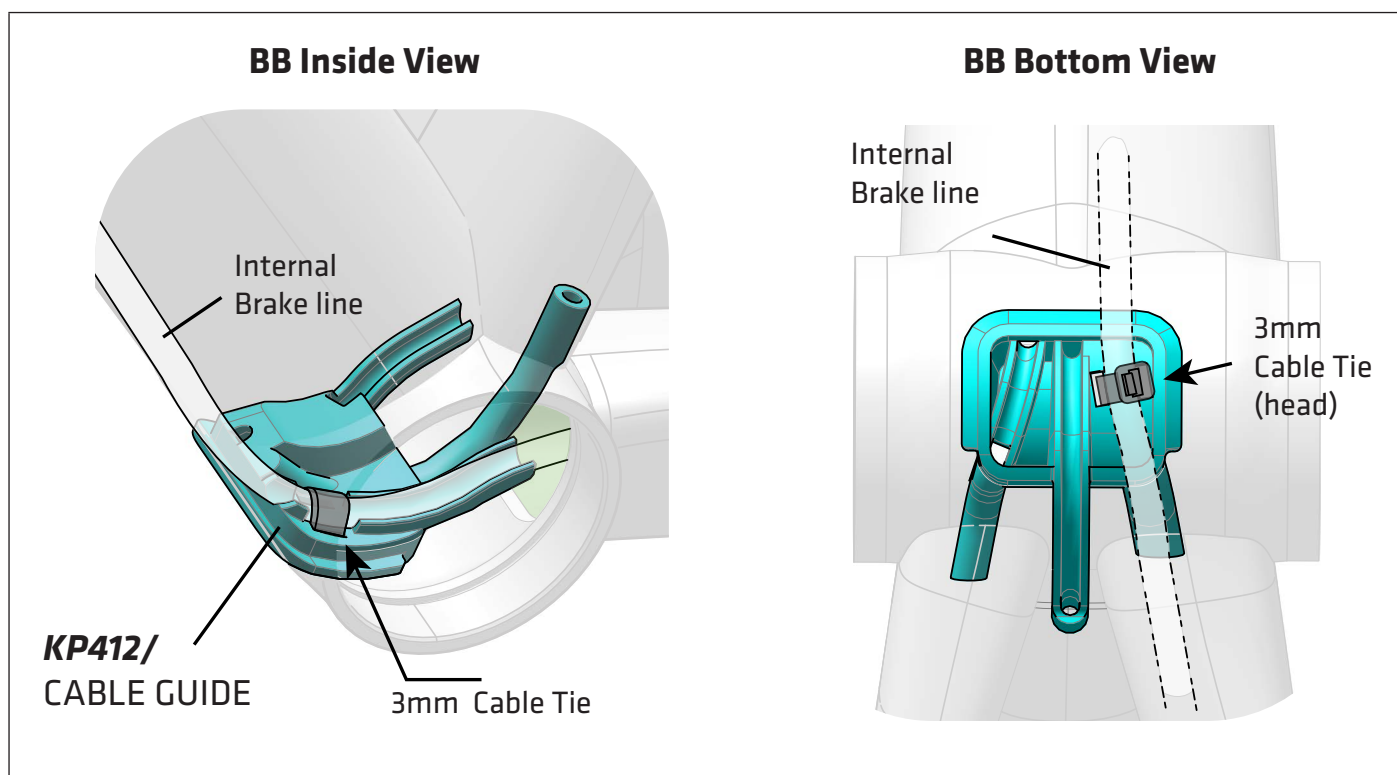

Figure A.

About this Service Bulletin

The following 2016-2017 models feature internal cable routing and the BB cable guide is **KP412/**:

CAAD10 DISC
CAAD12 DISC
SYNAPSE ALLOY
SLATE

Action to Take

Secure the brake line to the **KP412/** cable guide using a 3mm cable tie as shown in Figure A .

For clarity only the brake line is shown in the illustration.

WARNING

Secure the brake line to the KP412/ cable guide using a 3mm cable tie as shown in Figure A. The brake line must not rub the crank spindle. If the brake line rubs the crank spindle, it could cut the spindle and lead to a fall and possible injury.

WARNING

Information intended for use only by Authorized Cannondale Dealers. Special tools and skills are needed. Bike Owners must not perform the work described. Serious injury or damage can result.
